

# Mean Stack Training

DURATION: 8 weeks

MODE OF TRAINING: Classroom/Online

LEVEL: Advanced

## Course Introduction

Mean Stack has given a modern approach to web development that applies to all levels of your application. Mean is a combination of a group of technologies that synergizes well and Mean means "MongoDB Express.js AngularJS Node.js". The Node.js file saves us from learning a separate language because it allows us to use JavaScript in front-end and back-end interfaces. In a middle stack with NoSQL, the nature of MongoDB allows you to build a product with clear attributes and, without worrying about migrations, you can change and modify data layers.

Being a front-end web developer you want to give next level to your career as full-stack web developer. AnnexIT's full-stack training is the ultimate choice. Where you'll become an expert at front and back-end JavaScript with other more technologies of MEAN (MongoDB, Express, Angular and Node.js) Stack. Learn to create applications from very beginning to scalable and robust deployable application.

## Mean-Stack Course Curriculum

- NOSQL DB
- MongoDB
- MongoDB Collection
- MongoDB Document
- MongoDB- Operation
- JSON
- MongoDB with Javascript
- REST API
- Node.js & Express.js
- REPL Terminal,NPM
- Event Loop
- Module
- Express.js
- Building an Express app
- Node with REST API

- Building REAL Time Web Application, Token Based Authentication,Encrypt Decrypt Password
- Angular 2+
- Introduction To Angular
- Application Architectural view
- Angular Services
- HTTP,Error Handling
- Angular Forms ,Directives and Pipes
